ADVANTIS RIMTRONIC RF

Department: Locks Marketing

Date: 1st Nov 2019

• After the success of Advantis Rimtronic, we're introducing our next highly secure and the most budget friendly lock in Rimtronic series – i.e. **RIMTRONIC RF**.

Crafted by Godrej Locking Solutions & Systems, Advantis is a high tech lock that sits neatly between science and science fiction. As its name suggests, this is a **highly advanced lock**, packed with almost space-age functions that are simple to use. To put simply, Advantis brings the future of home safety on to your door.

Lock Accessories & Parts:

Connecting PCB (For Remote and VDP)

FABs:

Features	Advantage & Benefit
	Lock can be opened by using a RFID card for ease of access.
	Upto 100 RFID cards can be registered thus giving benefit of
	multiple user access.
RFID CARD	
	Lock can be opened by entering password (4 to 12 digits).
	This increases the complexity of the password thereby making it
ACCESS MODE:	more secure.
	6 unique passwords of your choice can be registered –
	(1 – Master password, 4 - user password , 1 – OTP)
	When the door is closed the dead bolt automatically come out,
	thus eliminating the hassle of manually locking the door
AUTOLOCKING	
2	Random numbers can be added before or after the password in
4 9	presence of strangers, thereby maintaining secrecy.
ADJUSTABLE	For E.g if the password is 1234 the lock can be opened by entering
SPYCODE:	1)5678 1234 *
	2) 1234 5678*
F / b	In case of low battery, a beep sound will alert you will in advance
	thereby reminding the user to change the battery before
LOW BATTERY	complete drain out.
INDICATION:	If password is entered wrongly for 5 times or if unauthorized
(<u>\$</u>)	RFID card is shown for 5 times the alarm goes on indicating
	unauthorized access. The Lock will freeze for 1 min.
BREAK-IN DAMAGE ALARM	
	If the safety button is switched on, the lock cannot be opened
<u>O</u>	from outside either by RFID. This feature can be used at night to
PRIVACY FUNCTION	restrict entry.
	If the temperature inside the house rises above 62 (±\$c), the lock
	automatically gets unlocked avoiding the hassle during fire break
FIRE SENSOR	out.
	Adjustable volume control up to 7 levels including mute function
	for silent operation
MULTI-LEVEL	
VOLUME CONTROL	

EMERGENCY BATTERY:	In case the battery is completely discharged an external 9V battery can be used to operate the lock.
	The lock is compatible with Remote and Video door Phone for ease of operation.
COMPATIBILITY:	

Applications:

- 1. Suitable for Wooden & Metal doors (Main doors / Interconnecting doors) in residential & commercial complexes.
- 2. Door thickness 35mm 50mm

Targeting:

- As such price point, anyone and everyone who is looking for a pocket friendly electronic lock for their residence.
- Not just main door, but it is highly economical for inside doors as well.
- Young aspiring people who want to lead a good lifestyle and set their own distinctive class. They are willing to go for branded products. They live in urban or sub urban locations and use internet for a wide range of purposes and are technology savvy.
- With a high disposable income, these customers are willing to spend for a high quality and aesthetically appealing product. People living in bungalows and premium flats.
- Hardware outlets : KRMs, Super KRMs, A class outlets

Architects, Builders and Interior Decorators

Families who aspire for lifestyle products

Packing Contents:

Indoor Body	1N
Outdoor Body	1N
Striker Body	1N
Packaging Plate	3N
Screw Packet	1N
RFID Cards	2N
'AA' Alkaline batteries	4N
User Manual	1N
Installation slip and Marker	1N
Service card & Warranty card	1N

Our Product comes from the land which is the worlds No 1 producer in Digital door locks, Mobile Phones, Appliances and all electronic devices – **KOREA**

Product Quality Test:

• Endurance Test

Test	Standard	Criterion
Deadbolt Strength Test	Horizontal load - 1600N / Vertical load - 2,700N	Not broken, normal operating
External Case Strength Test	Dropping 540g, Radius 50.8mm & 1.5m heights sphere on sample products	Can be broken, but normal operating
Latch bolt Vertical Pressure Test	Vertical load - 1,670N	No damage, normal operating
Door Close Shock Test	20 times of door close shocks, which is possible in windy environment & see product functions well	Normal operating
Open-Close Test	120,000 times	Normal operating
Open-Close Test (Push-pull)	120,000 times	Normal operating
Strike Pressure Test	3,000 N	Not broken
Handle Strength Test	Vertical load - 2,700N / Tensile strength - 2,700N / Torsion strength - 1,960N	Normal operating
Adhesion to Door Test	2,700N	No damage
Open-Close 10 Key Button Test	50,000 times (if the product has different ways other than pin code) / 100,000 (if only pin code)	
Open-Close RFID Card Key Test	60,000 times	
Open-Close Cell Key Test	60,000 times	
Open-Close Button Test	80,000 times	
Handle Operating Test	120,000 times (Both indoor and outdoor)	
Cover Operating Test	120,000 times	

• Climatic Test

Test	Standard	Criterion
Low Temperature Endurance Test	-40 degrees Celsius, 72 hrs	
High Temperature & Humidity Endurance Test	65 degrees Celsius, 95% of Humidity, 72 hrs	Normal operating in 5 mins
Low Temperature Operating Test	-30 °C/ 72 hrs	Normal operating
High Temperature & Humidity Operating Test	55 degrees Celsius, 95% of Humidity, 72 hrs	Normal operating
Temperature & Humidity Cycle Test	-30 °C/ 10 hr \rightarrow 70 °C/ 95% of Humidity / 10 hrs (5 Cycles): 120hrs	Normal operating
Indoor - Outdoor Temperature Difference Test	Indoor: 30 degrees Celsius/ 60%个 Outdoor: -30 °C / 12 hrs ~ 10 degrees Celsius/ 60%个 / 12 hrs (4 Cycles) : 96 hrs	Normal operating
Temperature Change Test	-2 °C 60% 24 hrs -> 0 °C 60% 24 hrs -> 2 °C 60% 24 hrs (1 Cycle): 72 hrs	Normal operating
Salt Water Spray Test	5% Salty water in 35°C and 72 hrs [12hrs spray / 12hrs stay]	Not corroded
Ultraviolet Rays Test	UV 280 ~ 315mm Nanometer / 96hrs	Not discolored

• Electric Test

Test	Standard	Criterion
Current Change Test	6V ~ 4V(measuring quiescent current every -0.2V) / Current : 1A	Normal operating
Battery Removal Test	50 times/ 10 seconds after power connected	Normal operating
Electric Shock Test	30kV/ 10Hz/ 250 times	Door never opened
ESD Endurance Test	Contacted Discharge _ 8KV / Air Discharge _ 15KV	Normal operating

• Fire Test

Test	Standard	Criterion
Temperature Sensor Test	Contact 100 °C heat for 10 times	Door never opened
Door Open Test in case Fire Accident	270 °C/ See if the door opens within 10 mins	82°C ± 5°C Door should be opened
Fireproof Test	1000°C 1hrs	Fire should be out in 10 sec.

• Disturbance Test

Test	Standard	Criterion
Drop Test	6 Surfaces, 3 edges and 1 angle / 1m height	No damage
Vibration Test	6Hz ~ 200Hz/1.047Grms/60min	No damage

• Additional Test

Painted or Plated products Test	Alcohol Robbing Test:Die Casting: 250g pressure, 300 timesPlastic: 250g pressure, 200 times (Frequently used area), 80 times (Less frequently used area)Adhesion Taping Test: Taping tests on 11 sections sized of 1mm * 1mmBoiling Test: Die Casting: 98°C, 1hr, 1/2 Immersion, 2hrs natural 	Alcohol Rubbing Test: raw material never be exposed. Adhesion Taping Test: No peeling Boiling Test: Pass the Adhesion Taping Test.
Hardness test by pencil	45°C 500g rpm10	Frequently used area: More than 3H Less frequently used area: More than1H

3 Bolts Lock Body

Additional Lock Accessories & Parts:

FABs:

Features	Advantage & Bonefit
	Advantage & Benefit
	Fingerprint Recognition: Once registered, sensor recognizes up to 100 fingerprints at any angle
360 DEGREE FINGERPRINT RECOGNITION	
PIN CODE	Lock can be opened by entering password (4 to 12 digits). This increases the complexity of the password thereby making it more secure. 6 unique passwords of your choice can be registered (1- Master Password, 4 User Password & 1 OTP)
AUTOLOCKING	When the door is closed the 3 locking dead bolts automatically come out, thus eliminating the hassle of manually locking the door
4 9 ADJUSTABLE SPY CODE	Random numbers can be added before or after the password in presence of strangers, thereby maintaining secrecy. For E.g if the password is 1234 the lock can be opened by entering 1)5678 1234 * 2) 1234 5678*
LOW BATTERY INDICATION	In case of low battery, a beep sound will alert you will in advance thereby reminding the user to change the battery before complete drain out.
	Anti Hack: Forceful opening from outside will generate alarm Anti Prank: Locks stops functioning for 1 minute after 5 failed
ALARMS	attempts and generate series of alarms Deadbolt Error: Alarm activates when door is not proper closed or deadbolt is jammed.
PRIVACY FUNCTION	If the privacy button is on, the lock cannot be opened from outside either by fingerprint or password. It can be accessed via Mechanical Key only. This feature can be used at night to restrict entry.

6	One Time Password (OTP)/ Guest Pin: Guest pin is for one time use for guest.
ONE TIME PASSWORD	
	Sleek Body: Outer body is of 19.2 mm only.
SLEEK BODY	
	Passage Mode: Once switched on, Deadbolt function is disabled and only latch operates.
PASSAGE MODE	
	Adjustable volume control up to 7 levels including mute function for silent operation
MULTI LEVEL VOLUME CONTROL	
EMERGENCY MICRO USB	In case the battery is completely discharged external Power Bank can be used to provide emergency power supply to operate the lock.
	The lock is compatible with Remote and Video Door Phone for ease of operation.
COMPATIBILITY	
	In case of an emergency the lock can be opened with EXS mechanical key, which is higher technology as compared to others.
MECHANICAL KEY	

Applications:

- 1. Suitable for Wooden doors (Main doors / Interconnecting doors) in residential & commercial complexes.
- 2. Also suitable for Left or Right / Inside or Outside opening door
- 3. Door thickness 35mm 75mm
- 4. Backset 70mm

Targeting:

- Young aspiring people who want to lead a good lifestyle and set their own distinctive class. They are willing to go for branded products. They live in urban or sub urban locations and use internet for a wide range of purposes and are technology savvy.

ADVANTIS DIGITAL CABINET LOCK

Department: Locks Marketing

Date: 01th Oct 2019

• Crafted by Godrej Locks and Architectural Fitting & Systems, Advantis is a high tech lock that sits neatly between science and science fiction. Providing completely keyless security lock solution to your *Cabinets and Cupboards*.

FABs:

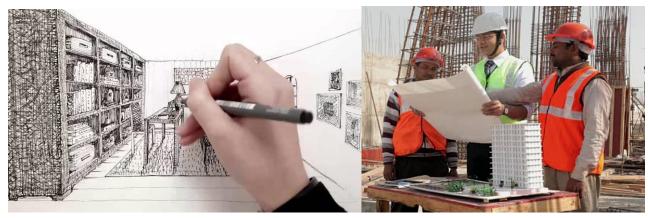

Features	Advantage & Benefit
ACESS MODE	a) 4-9 digit password for enhanced password strengthb) Registers up to 14 unique passwords.
AUTO MANUAL	Auto and Manual Locking mechanism: The bolt can be engaged through either automatic setting or by type in your password.
LOW BATTERY INDICATION	In case of low battery, a beep sound will alert you in advance thereby reminding the user to change the battery before it gets completely drained out.
BREAK IN DAMAGE ALARM	An alarm goes off if there is an attempt of tampering with the latch bolt.
OTP PASSWORD	One time access can be provided to guests in your absence, without reveiling your usual password.
EMERGENCY BATTERY	In case the batteries run out completely, a 9V external power battery-case can be used to open the lock using the emergency power cable (cable available as spares).
SECURE MODE	An alarm goes off in case the password in entered incorrectly 3 times in a row to alert the owner from unauthorized access.

Applications:

- 1. Suitable for hinged wooden cabinets and cupboards.
- 2. Suitable thickness 12-22mm.

Targeting:

- Young aspiring people who want to lead a good lifestyle and set their own distinctive class. They are willing to go for branded products. They live in urban or sub urban locations and use internet for a wide range of purposes and are technology savvy.
- With a high disposable income, these customers are willing to spend for a high quality and aesthetically appealing product. People living in bungalows, premium flats and mid range flats.
- Hardware outlets : KRMs, Super KRMs, A class outlets

Architects, Builders and Interior Decorators

Families who aspire for lifestyle products

Packing Contents:

Outer body	1N
Inner Body	1N
Striker plate	1N
Screw Packet	1N
User Manual	1N
Installation Slip + Marker	1N
Service Card	1N
Warranty Card	1N

FAQs:

- Are batteries included in the packaging?
 No. Batteries are to be bought separately. Only AA alkaline batteries are recommended.
- 2. What to do in case the battery completely drains off? Emergency power supply can be provided to the unlock using an emergency power cable (available as spare) with a 9V battery.
- 3. What to do when alarm doesn't stop beeping? Please put in your master password, followed by "#" to stop the alarm.
- **4. Where can I find the emergency power supply cable?** Emergency cable can be bought separately from the service team.

- 5. Can the lock be fitted to sliding cupboard door?No. The lock is to be used only with Hinged cupboard doors/cabinets.
- 6. What is the installation fee and warranty period for the lock? The installation is free with the lock and the warranty is 1 year from the date of purchase.

ADVANTIS CRYSTAL

Department: Locks Marketing

Date: 8th June 2018

 Crafted by Godrej Locking Solutions & Systems, Advantis Crystal is a high tech lock that sits neatly between science and science fiction. As its name suggests, this is a highly advanced lock, packed with almost space-age functions that are simple to use.

Front & Back View:

Front

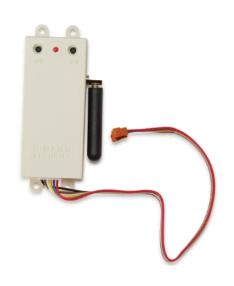

Back

Lock Accessories & Parts:

RFID Tag

VDP Module

Strike Box

FABs:

Features	Advantage & Benefit
	Lock can be opened by entering password (4 to 12 digits).
	This increases the complexity of the password thereby making it
ACCESS MODE:	more secure.
	4 unique passwords of your choice can be registered –
	for E.g 1) 1234*
	2) 5678*
	3) 1111*
	4) 2222*
	Lock can also be opened by using a RFID card for ease of access.
	Upto 100 RFID cards can be registered thus giving benefit of
RFID CARD	multiple user access.
	When the door is closed the 2 locking dead bolts automatically
	come out, thus eliminating the hassle of manually locking the
AUTOLOCKING	door
2	Random numbers can be added before or after the password in
4 9	presence of strangers, thereby maintaining secrecy.
ADJUSTABLE	For E.g if the password is 1234 the lock can be opened by entering
SPYCODE:	1)5678 1234 *
	2) 1234 5678*
►∕ ₽	In case of low battery, a beep sound will alert you will in advance
	thereby reminding the user to change the battery before
LOW BATTERY	complete drain out.
INDICATION:	If password is entered wrongly for 5 times or if unauthorized
	RFID card is shown for 5 times the alarm goes on indicating
	unauthorized access. The Lock will freeze for 1 min.
BREAK-IN DAMAGE ALARM	
	If the safety button is switched on, the lock cannot be opened
৾	from outside either by RFID or Password it can be accessed via
PRIVACY FUNCTION	Mechanical Key only. This feature can be used at night to restrict
	entry.
	If the temperature inside the house rises above 65 (±5c), the lock
	automatically gets unlocked avoiding the hassle during fire break
FIRE SENSOR	out.

	Adjustable volume control up to 7 levels including mute function for silent operation
MULTI-LEVEL VOLUME CONTROL	
ØV	In case the battery is completely discharged an external 9V battery can be used to operate the lock.
EMERGENCY BATTERY:	
	The lock is compatible with Remote and Video door Phone for ease of operation.
COMPATIBILITY	

Applications:

- 1. Suitable for Glass Door Lock in residential & commercial complexes.
- 2. Door thickness 12mm

Targeting:

NEW PRODUCT LAUNCH ADVANTIS RIMTRONIC VERTI

NEW ADVANTIS RIMTRONIC VERTI

RIMTRONIC VERTI | FEATURES

RFID CARD:

Once Registered, the lock card operate using 100 RFID cards.

PIn Code The lock can be opened by entering the 4 to 12 digit passcode; this complex passcode makes it more secure.

Fire Sensor If the temperature inside the house rises above 65 (±5c), the lock automatically gets unlocked avoiding the hassle during fire break out.

Multi-level Volume Control The adjustable volume control has 7 levels, including a mute function for silent operation.

Adjustable Spycode

In the presence of strangers, random numbers can be added before or after the passcode, thereby maintaining secrecy.

Low Battery Indication

In case of low battery, a beep sound will alert you in advance, reminding you to change the battery.

Autolocking

When the door is shut, the locking dead bolt automatically comes out, thus eliminating manual locking hassle

Break-In Alarm An alarm goes off if the passcode is entered incorrectly 5 times in a row.

Privacy Function

If the privacy button is on, the lock can't be opened from outside by RFID or passcode.

Emergency Battery In case the battery is completely discharged an external 9V battery can be used to operate the lock.

RIMTRONIC VERTI | APPLICATIONS

- Suitable for Wooden doors (Main doors / Interconnecting doors) in residential & commercial complexes.
- Suitable for Double/Single doors, Sliding doors
- Suitable for Left/right opening or Inside/Outside opening doors.
- Door thickness 35mm 65mm
