GHEORG SEEBACHER

"La curiosità è alla base della comprensione; è perciò essenziale vedere le persone come utilizzatori finali. Dobbiamo cercare di capire i loro valori, contesti culturali e le loro richieste, come future possibilità tecnologiche e collegare, infine, tutti questi aspetti. Attraverso questa comprensione, aspiro, con passione, a sviluppare concetti e implementarli, creando prodotti affascinanti in grado di soddisfare tanto le richieste emozionali quanto quelle funzionali."

"Curiosity forms the basis of understanding. It is therefore essential to see people as users.

We must seek to understand their values, cultural backgrounds, and demands as future technological possibilities and also connect all of these aspects. With this understanding, I passionately aspire to develop concepts and to implement them by creating fascinating products that meet emotional as well as functional requirements."

MICHELE FAINI

"In uno scenario sempre più competitivo nella ricerca, ma appiattito nel gusto, cerco di riportare i miei progetti alle radici della nostra cultura. Il mio obiettivo è soddisfare un bisogno, tenendo conto della ricerca del bello, dell'armonia e dell'estetica, unite alla funzionalità e all'utilità.

Siamo geneticamente padroni di fascino ed eleganza, grazie a secoli di fastosa cultura artistica posta agli apici del mondo: la capacità di voltarsi indietro per andare avanti è, a mio parere, la marcia in più che porta a nuove strade di creatività pura."

"In a period, increasingly competitive in the research, but flattened in the style, I try to bring my projects to the roots of our culture. My goal is to satisfy a need, taking into consideration the research of beauty, harmony and aesthetics, combined with the functionality and usefulness of products. Thanks to our artistic culture placed at the apex of the world, We are genetically owners of charm and elegance: The ability to look back, for going on, is, in my opinion, the extra edge leading to new avenues of pure creativity."

"In questo concept, gli aspetti sensoriali e l'approccio di lasciare che ogni singolo pomolo sia slegato dal suo orientamento, sono le caratteristiche principali nello studio della serie Twist.

La stratificazione, la ripetizione di forme che si fondono e la libertà di montaggio hanno portato alla forma di un pomolo, che dà ai cristalli Swarovski una straordinaria inquadratura architettonica e scultorea. L'idea è nata dalla volontà di creare una forma in grado di elevare le superfici irregolari e che appare diversa, ogni qualvolta si cambia leggermente direzione di montaggio: Twist Unicità e imperfezione."

Nella collezione Twist, i cristalli Swarovski vengono proposti in tre differenti colorazioni: nero, abbinato al pomolo nero opaco dal carattere progressive e di tendenza; golden shadow abbinato al pomolo con finitura oro opaco per una versione più raffinata fashion, dalle tonalità brillanti; infine il cristallo Swarovski trasparente per magiche combinazioni e brillanti giochi di luce.

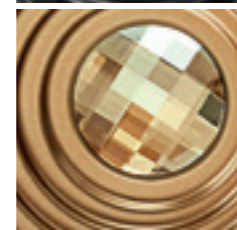

"The sensory aspects and the approach of letting each knob look individual by orientation, are the main features in the study of the Twist collection. The layering, repetition of shapes that blend and freedom of assembly led to the form of a knob, which gives the Crystals from Swarovski an extraordinary architectural and sculptural framing.

The idea was born from the desire to create a form that looks and seems to be different every time you change direction of mounting able to elevate the irregular surfaces: Uniqueness and imperfection."

The TWIST collection is presented with Crystals from Swarovski in three different colors: Black, combined with the knob in Matt black finish, a progressive and trendy version; golden shadow combined with the knob in gold finish for a more refined and fashion solution, with bright shades; finally the Crystals from Swarovski transparent for magic and brilliant version: exclusive and sparkling Made in Italy Knobs.
