SEMI AUTOMATIC SLIDING DOOR SYSTEM

OZOM-SA-111-N ₹ 37,950

The Semi Automatic Doors System is a sliding door which is opened manually but closes automatically on its own with the help of an air cylinder mechanism. It does not require any electrical connection. Another important feature of this door is that it closes softly on the last end making its closing very smooth and silent. The closing speed can be adjusted as per the traffic movement and opening size. The maximum door width possible for this system can be 1000mm (track length 2100mm) and the maximum door weight 80kg. The door can be integrated with standard locks. An ideal application for these doors is rest room entrances, conference rooms etc. The system can be used for frameless glass doors as well as framed/wooden doors.

STANDARD SPECIFICATIONS:

Movable Acoustic Wall Partition System shall consists of top hung manually operated acoustic panels which can be linked together to form an acoustic wall.

PANELS: Based on the requirement the panels shall be constructed of board separated by acoustic insulation to achieve the specified sound rating. Panel Faces are replaceable at the site.

ACOUSTICS: Acoustic walls are classified by a STC (Sound Transmission Class) rating for their effectiveness in reducing transmitted sound. Based on Acoustic Requirements the panels shall be of STC 45 or STC 52. STC 45 shall make the wall with loud speech barely audible on other side & STC 52 shall make the wall with shouting barely audible on other side.

CLOSURE: The movable acoustic wall shall be acoustically opened & closed with the help of an expanding panel located at the stacking end of the system. There is an over-sleeve on the expanding panel which can be expanded side ways to lock the acoustic wall in place. The oversleeve is expanded and retracted by a removable handle in the face of pane.

STACKING: While opening of movable acoustic wall, panels shall be parked in a side stack configuration which means that single panels are hung at two points at the top corners of each panel. Panels will stack with one point remaining on the main track and other on the side track.

SEALS: There shall be sweep seals at the top of the panels to seal them acoustically to the track. There shall be retractable seals at the bottom of the panels to seal them acoustically to the floor.

For wooden partitions:

Panel Thickness	DB Value	Max. Panel Height	Max. Panel Width
85 mm	45 DB	12000	1250

DIGITAL SAFES

FOR HOMES, OFFICES & COMMERCIAL SPACES

ABOUT US

Established in 1999, Ozone has a global presence across 15 countries, 4 R&D centers across Israel, Korea, China & India, and 4 state-of-the-art factories in India & China. Ozone Secutech is a professional safety and security solution provider having its own design center, manufacturing, sales & service setup.

Using the latest techniques blended with cutting edge technology, we are constantly developing innovative solutions that improve our customers' lives through greater security, safety and convenience. We offer complete range of safety & security products and solutions for institutional, commercial and consumer markets.

We offer a comprehensive range of choices in usability and design. Our range of Digital Safes include Biometric (fingerprint) enabled, PIN/password enabled, fire resistant, water resistant, moisture resistant & chemical resistant safes. We also make connected safes equipped with state-of-the-art burglary resistant GSM module - 'Notify'.

All our products go through stringent quality checks and are designed for durability, reliability and high performance.
